

Best Way to Number ICT Equipment (Asset Coding System)

You need a **structured asset numbering format** that shows:

1. Campus
 2. Asset Category
 3. Year (optional but useful)
 4. Unique Serial Number
-

Recommended Asset Tag Format

Format:

SLA-CMP-ICT-001

Or more structured:

SLA-[Campus Code]-[Asset Type]-[Year]-[Number]

Example:

- **SLA-MW-CMP-2025-001**
 - **SLA-MW-PRJ-2025-002**
 - **SLA-KZ-LTP-2025-015**
-

Step 1: Assign Campus Codes

Campus	Code
Main Campus	MC
Mwenge Campus	MW
Kinondoni Campus	KN
Mbezi Campus	MB

(Adjust to your real campus names.)

Step 2: Assign Asset Type Codes

Device	Code
Desktop Computer	DTP
Laptop	LTP
Projector	PRJ
Printer	PRT
Router	RTR
Switch	SWT
Tablet	TBL
TV/Screen	SCR
UPS	UPS

Example Asset Numbers

A projector in Mwenge campus:

SLA-MW-PRJ-2025-003

A laptop in Main campus:

SLA-MC-LTP-2025-014

A desktop in Kinondoni:

SLA-KN-DTP-2024-022

Why This Is the Best Approach

- ✓ You instantly know where the asset belongs
 - ✓ You know what type it is
 - ✓ You know the year of purchase
 - ✓ Easy to track transfers between campuses
 - ✓ Works well in Excel, asset software, or audit reports
 - ✓ Scalable as you grow
-

Physical Labeling Recommendations

Use:

- Printed laminated asset tags
- Barcode stickers (recommended)
- QR codes (best for modern tracking)
